Implementation Strategies and Success Sessions

**Phase 1: Plan for Success**

*Play recording* (25 min)

The first of a three-part series, PIE Phase 1 provides instructors with an introductory session, which offers an overview of the MyLab products. This session is a springboard to launch instructors preparing a MyLab course and is designed to assist in planning for the successful alignment of a MyLab course with an instructor’s individual course goals. This session covers a brief discussion of the development of the MyLab Suite, in addition to a tour of a MyLab course, a “quick start” setup of a MyLab course, some best practices for successful implementation, and finally, guidance in aligning MyLab to the goals of an instructor’s individual course.
