Get Access to Learning Catalytics in Your MyLab

Your instructor will let you know if your class is using Learning Catalytics with a MyLab course.

1. To access **Learning Catalytics**, click on the **Course Calendar** dropdown menu then click on **Student Resources**. A new menu will populate to the right of the main menu. Click on **Learning Catalytics**. A new pop up window appears and links you straight to Learning Catalytics. You do not need to sign in again.

2. If you purchased MyLab **without** eText, you are prompted to purchase access to Learning Catalytics. If you purchased MyLab **with** eText, you can access Learning Catalytics right away from your MyLab course.

   - You get Learning Catalytics access FREE with the eText for your MyLab course. Students who purchase or receive the specific eText edition associated with their MyLab course gain a subscription to Learning Catalytics. The subscription duration may be for either 18 months (for most textbooks) or 24 months (for eTexts that are typically used over two semesters).
   - If you purchase a subscription to Learning Catalytics separately, you have the option to purchase access for 6 or 12 months.

**Important Tips**

- Confirm your access **before** your professor delivers the first session. If you wait until you are prompted to join a session and you don’t have access, you are prompted to purchase access when you try to join.
- After you cross over from MyLab to Learning Catalytics and confirm or purchase access, you can join sessions from your MyLab course or from learningcatalytics.com. Make sure to use your MyLab username and password if you join sessions from learningcatalytics.com!
